Schroeder Environmental announces expansion of Rescue Standby and Floating Roof Services

Schroeder Environmental Cleaning Services, Inc. (SECSI) is pleased to announce the expansion of two of our more popular services – Rescue Standby and Floating Roof Services.

RESCUE STANDBY – SECSI has always provided our own rescue standby for all of our confined space entries. Over the past five years, our clients have asked us to provide a stand-alone rescue standby service, which we have done on a request basis. We are now expanding our rescue standby service. All of our employees are confined space entry and rescue trained and qualified in CPR & First Aid. Our services are completely self-contained and are for virtually any type of confined space.

FLOATING ROOF SERVICES – In addition to IFR leg repositioning, we also provide pontoon repair and demo services.

Our popular **Seal Inspection Program** includes:

- Seal gap calculation
- In or out of service secondary seal repair and replacement
- Primary seal replacement
- Column, leg and gauge float seals
