

Patented Twin FlexRail (D605,825) - Mobility, Productivity and Safety

- The Patented Twin FlexRail (D605,825) consists of two individual enclosed tracks providing bypass capability for users.
- The enclosed track design eliminates snow, ice, and dirt & debris build-up.
- The enclosed tracks with sealed bearing trolleys provide 1:100 movement-to-weight ratio. This allows, the SRL remains directly overhead at all times eliminating the possibility for a swing fall.
- The system is capable of spans of 100' between supports and 30' cantilevers past the end supports.
- FLS specializes in OSHA-compliant training, design, fabrication and installation of systems.
