

TOTAL TANK MANAGEMENT

Veolia ES Industrial Services is structured to provide integrated services with a single point of responsibility. Total Tank Management is offered as a program where we can be of service every step of the way. From engineering, design and construction, to repair, maintenance and cleaning, Veolia is a one-stop shop for Tank Services. We employ numerous cleaning systems that include circulation nozzles, robotic manless entry cannons and manway mounted cannons. All are designed to clean the tanks under sealed conditions and eliminate fugitive emissions. If required we offer vapor control and degassing. Our Mechanical Division provides API 650/653 storage tank maintenance, repairs and capital upgrades for Pipeline, Terminal, Petrochemical and Refining Industries. Contact Veolia today to learn more about our Total Tank Management program.

- ④ TANK ENGINEERING & DESIGN
