Hose Master Offers an Ultra High Pressure Corrugated Metal Hose As Well As Standard and Customized Expansion Joints

Hose Master introduces PressureMax HP™ - its new hydroformed, annular, heavy-wall corrugated metal hose specifically designed for ULTRA high-pressure applications. Available in 3/4" – 1 1/2" diameters, PressureMax HP is made from T321 Stainless Steel, and offers superior flexibility with extreme pressure capabilities.

Hose Master also offers an array of metal expansion joints in standard and customized single and multi-ply designs. Available in 2" – 120" I.D., in a variety of stainless or nickel alloys, these expansion joints offer excellent axial and lateral movement as well as pressure ratings from full vacuum to 3000 psi. Temperature ranges from -450° F. to 2000°

For details, please contact Hose Master's customer service department at (800) 221-2319 or take a look at our PressureMax HP™ Product Focus page or Expansion Joint Brochures online at www.hosemaster.com
